### INDOFIL SMB 20 Product Description

Soft Microfine Acrylic Resin Binder

#### Chemical Characteristics.

Composition	:	Anionic Proprietary blend of Acrylic emulsion
Appearance	:	Translucent emulsion.
Active Content	:	20.0±2.0%
pH of 10% solution	:	5.0 – 6.0
Film Hardness	:	Very Soft
Charge Particle size	:	Ultra fine

#### Application

Indofil SMB-20 is a very soft micro fine acrylic binder best suitable for finishing all Full grain shoe softy, garments, gloving and milled leathers. It imparts good adhesion and a warm natural aniline look.

Indofil SMB -20 is recommended 50 -200 parts in base and intermediate coats.

#### Properties

Indofil SMB-20 is a micro particle size acrylic emulsion recommended for aniline and semi aniline finish on leathers. It has good adhesion. Being very fine, soft and stretchy, the handle of the leather is largely untouched and thus retains the natural characters of Leather.

Indofil SMB-20 imparts the following unique properties.

- Micro fine particle size.
- Imparts very soft handle with natural look.
- Improves adhesion properties in Finishing.
- Recommended for Semi Aniline and Aniline leathers.
- Good Cold Crack Resistance
- Compatible with all anionic fishing auxiliaries
